LUTON

PUBLISHING DATE: **2010-05-31** | COUNTRY CODE: **GB**

Luton is only a five minute walk away from London* and features a large array of shops, easily accessed by old and disabled people shopping for headwear.

Luton is where it's hat.

Luton is famous for a history of hat making and production of Vauxhall cars, neither of which still occur. Luton is also famous for being the base of EasyJet and Monach Airlines, neither of which were destroyed in the great fire of 1336 unfortunately.

Food/safety.

Luton's population is 68% white so, even if you're not as safe as other parts of England, you'll at least get some great kebabs. Avoid fried chicken outlets though unless you want cockroaches as pets.

Geography.

It's practically London.

*After an hour coach journey.
